WORK EXPERIENCE

Full Stack Developer | FullCircle Technologies Inc. – San Francisco, CA (Remote) | Nov 2024 - April 2026

- Engineered reusable **React + TypeScript** component library (dashboards, modals, panels) adopted across **2 production products** reducing UI development time significantly.
- Architected **Google OAuth 2.0 + RBAC** authentication for controlled **multi-user access** across internal workflows.
- Built **Shopify-integrated** support tools for user, order, and ticket management – impacting **1000+ active users**.
- Integrated **REST APIs** for real-time customer, order, and subscription data in **production dashboards**.
- Delivered **full-stack** features end-to-end following **clean code** standards, **Git workflows**, and **agile sprints**.

SKILLS

Programming Languages: JavaScript (Advanced), TypeScript (Intermediate), Python

Frontend: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend & Auth: Node.js, Express.js, REST API, MongoDB, SQL, Google OAuth 2.0, JWT, RBAC, Session Management

Cloud & Tools: DigitalOcean, Vercel, Git, GitHub, Postman, Vite, Figma, Jest, CI/CD

AI & Dev Tools: Prompt Engineering, GitHub Copilot, LLM API Integration, AI Workflow Automation

E-Commerce: Shopify API Integration, Subscription Management, Order Management

PROJECT

FullCircle Customer Experience Dashboard | React, TypeScript, Redux Toolkit, Tailwind CSS, DigitalOcean ([Live](#))

- Built agent-facing dashboard for managing users, orders, and Shopify tickets serving **1000+ users**.
- Developed **15+ reusable UI components** and optimized **state management** for multi-panel enterprise workflows.

Customer Self-Service Portal | React, TypeScript, Redux Toolkit, Tailwind CSS, Google OAuth ([Live](#))

- Built a full-featured self-service portal for **1000+ customers** to independently manage **multiple subscriptions** across different addresses, payment methods, and delivery frequencies.
- Implemented **10+ subscription action workflows** – reactivate, skip, reschedule, swap product, edit quantity, consolidate, and cancel – directly reducing support agent workload.
- Developed **real-time order tracking dashboard** displaying order history, processing status, and total dues across multiple concurrent orders.
- Integrated **Shopify subscription & order APIs** to sync live customer data including next order dates, billing details, and product information.

Nestmate | React, React Native, TypeScript, Node.js, MongoDB, REST APIs (*Web & Mobile*, [Live](#))

- Developed a full-stack roommate and rental platform across mobile applications and the website, enabling users to discover compatible flatmates and shared accommodations.
- Developed secure authentication and role-based access control for multiple user types.

EDUCATION

Bachelor of Technology (CSE - AI & ML)

Lakshmi Narain College of Technology, Bhopal (*Oct 2022 - June 2025*) | **CGPA: 7.77/10**
